EDUCATION

The University of Texas at Austin

Aug 2023 - Dec 2026

Bachelor of Science in Electrical and Computer Engineering, Cockrell School of Engineering

GPA: 3.63

Minor in Entrepreneurship, McCombs School of Business

- **Relevant Courses:** Management, Data Science Laboratory, Software Design Laboratory, Cybersecurity, Circuit Theory
- **Teaching Assistant,** Engineer Design and Problem Solving (ES 301)

SKILLS

Product: Agile/Lean Methodologies, Scrum, Jira, Confluence, Product Lifecycle, R&D, Prototyping, QA Oversight

Data Analysis: Tableau, Power BI, Microsoft Excel, PowerPoint, Google Suite, A/B Testing, KPI Tracking

Technical Development: C, C++, Python, Java, Javascript, HTML, CSS, SQL, MATLAB, API Integration

Certifications: AT&T Technology Academy, IBM AI Product Manager Professional (IP)

WORK EXPERIENCE

Technical Project Manager

May 2025 - Present

Peninsula Barbell – San Francisco, CA

- Launched a full-stack, responsive React.js website for a local gym based on specific stakeholder requirements to effectively modernize digital operations and establish a scalable online presence
- Increased brand visibility by integrating a digital gallery, having UI/UX features by including animations to create a positive e-commerce experience for customers
- Optimized development by leveraging AI tools (ChatGPT, Claude, Gemini) for prototyping and codebase management

Engineering Operations Intern

Oct 2024 - May 2025

PHD Energy Premium Battery Technologies – Austin, TX

- Designed processes to test over 100+ battery cells, leading diagnostic efforts to identify and resolve critical component malfunctions ensuring project milestones were met for customers and businesses
- Translated complex performance data into actionable Excel reports to stakeholders, influencing decisions on battery design, quality assurance, and business processes
- Collaborated cross-functionally with Operations following quality assurance protocols which minimized testing and ensured 100% compliance with all technical standards and regulations
- Used Neware, Labview, and various other software tools and hardware tools for applications on processes

Business Analyst

May 2021 - Aug 2023

Holiday Motel – Port Lavaca, TX

- Conducted monthly financial analysis by reconciling all bank transactions (ACH items, income, purchases) in QuickBooks, monitoring P&L statements, and delivering consolidated reports to the external accountant with administrative support
- Translated profit/loss analysis into actionable business recommendations, presenting data-driven cases for capital expenditures on high-ROI property renovations

LEADERSHIP EXPERIENCE AND ACADEMIC PROJECTS

Technical Project Manager | Visual-to-Audio Object Awareness System

Jan 2026 – Dec 2026

- Directed a 6-person cross-functional team by delegating technical deliverables, managing project timelines, and setting structured agendas for recurring stakeholder meetings to ensure alignment on milestones
- Managed comprehensive risk management initiatives, executing both project-wide and individual risk reduction strategies to proactively identify and mitigate roadblocks in the development cycle
- Served as the Technical Project Lead, overseeing end-to-end system integration while actively assisting in the hands-on creation and testing of critical hardware and software modules

Marketing Officer | TransitTalk Project Pitch

Jan 2025 - May 2025

- Led a cross-functional team conducting user research by interviewing 20+ commuters to inform 3 prototype features
- Drove the business and marketing strategy by designing an in-app reward system to drive user engagement and securing 2 local business partnerships for the proposed launch

Embedded System Product Design

Nov 2024 - Dec 2024

- Led the end-to-end design of a C-language implementation of a Pokémon battle simulation in C; featured 8 opponents, 2 sound effects, healing mechanics, 4 dynamic movesets, and mid-battle switching between 3 Pokémon
- Won second place out of 100+ teams in the ECE 319k Embedded Systems Design Competition
